

JUAN GABRIEL SANTIAGO
Department of Mechanical Engineering
Stanford University

Education

University of Illinois at Urbana-Champaign

Ph.D., Mechanical Engineering, August 1995, GPA 4.0/4.0

Thesis: "An Experimental Study of the Velocity Field of a Transverse Jet Injected into a Supersonic Crossflow"

University of Illinois at Urbana-Champaign

M.S., Mechanical Engineering, August 1992, GPA 4.0/4.0

Thesis: "Facility Design and Preliminary Experiments for an Endothermic Fuel Combustion Facility"

University of Florida at Gainesville

B.S., Mechanical Engineering, May 1990

Undergraduate GPA 3.95/4.0, High Honors, First in Graduating Class

Work Experience

Stanford University, Stanford, California

Department of Mechanical Engineering

Full Professor, 9/10-Present

Interests include microfluidic systems for chemical and biological assays; methods and devices for automated sample preparation; and miniature drug delivery systems. Teach undergraduate and graduate courses in fluid mechanics, transport phenomena, experimental methods, and electrokinetic phenomena.

Chair of Thermosciences Group, 9/09-10/12

Associate Professor, 4/05-9/10; Assistant Professor, 9/98-4/05.

Cooligy, Inc., Mountain View, California, <http://www.cooligy.com/>

Founder and Senior Consultant, 1/02-1/06:

Company was the first to commercialize liquid cooling loops for microprocessors on a mass produced personal computer. Raised funds, assembled team, and launched company. Consulting activities included development of models and experiments to design and optimize pumps and liquid cooling.

University of Illinois at Urbana-Champaign

Department of Electrical and Computer Engineering, Beckman Institute for Advanced Science and Technology, BioMEMS Laboratory.

Research Scientist/Postdoctoral Fellow, 3/97-9/98:

Conducted experimental studies of flows in microfluidic devices using micron-resolution particle image velocimetry (PIV). Developed microfluidic devices for chemical and biological separation.

The Aerospace Corporation, Spacecraft Thermal Department, El Segundo, California

Senior Member of the Technical Staff, 10/95-3/97:

Worked as a research engineer in the field of thermal science. Analyzed and designed spacecraft and launch vehicle thermal technology using Monte-Carlo thermal radiation modeling, finite-difference modeling, convective heat transfer analyses, and thermal system analyses. Designed a micro-resolution particle image velocimetry (PIV) system for investigations of micro-satellite thrusters.

University of Illinois at Urbana-Champaign

Department of Mechanical and Industrial Engineering

Graduate Research Assistant, 5/92-10/95:

Conducted a study of the mixing phenomena of an underexpanded, sonic jet injected into a supersonic crossflow. Used laser Doppler velocimetry measurements of mean velocities and Reynolds stresses to

study flow field structure and jet development. Investigated instantaneous mixing using planar laser-induced fluorescence (PLIF) imaging. This study provides guidance to supersonic combustor designers and helps validate numerical predictions.

Teaching Fellow, 8/94-12/94:

This departmental award offered the opportunity to teach a department course of my choice: the fluid mechanics lecture course. Solely responsible for the development of course syllabus, lecture notes, class handouts, homework assignments, and exams. Presented all lectures and assigned final grades. Graded homework and exams.

Graduate Research Assistant, 8/90-5/92:

Led the design, construction, and instrumentation of a high-speed combustion wind tunnel facility. Carried out turbulent flame speed measurements, was designed to demonstrate the performance of the combustor facility and supporting systems. The facility was designed to study the combustion characteristics of endothermic fuel mixtures at simulated Mach 6 flight conditions of a turboramjet burner.

Exxon Production/Eastern Division, New Orleans, LA

Graduate Summer Intern, 5/90-8/90: Researched and compiled reports of over 15 oil well production histories. Based on this study, presented recommendations for two well restorations and three well abandonments.

University of Florida at Gainesville

Tutor, 8/88-5/90: Self-employed tutor of thermodynamics and fluid mechanics for undergraduates. Developed class outlines to supplement class notes.

Academic Areas of Interest and Research Methods

Academic: Fluid mechanics; microfluidics; electrokinetics; colloid science; experimental methods and random data analysis; microfabrication; heat transfer; analytical and numerical modeling of transport phenomena.

Fluid Mechanics and Optical Diagnostics Research: Particle image velocimetry, particle tracking velocimetry, caged-fluorescence imaging, bleached-fluorescence imaging, planar laser-induced fluorescence imaging; digital image processing (including particle tracking, pattern recognition, and filtering); CCD and ICCD camera/computer interfacing and imaging; flow seeding techniques; schlieren and shadowgraph techniques; laser Doppler velocimetry; experimental research facility design, construction, and instrumentation; surface flow visualization techniques; phase Doppler anemometry; and hot-wire anemometry.

Microfluidics Research: Mask layout and drafting; photolithography; chemical and reactive ion plasma etching of silicon and glass wafers; and epoxy-based photoresist; thermal oxide processing of silicon; anodic, thermal, and RTV bonding; thin film deposition; epifluorescent microscopy; confocal microscopy; scanning electron microscopy; and micro-fluidic system assembly, interconnect, and control.

Awards and Honors

1. Inducted into the College of Fellows of the American Institute for Medical and Biological Engineering (AIMBE), 2016.
2. 1st Place Prize Poster, "Multi-stage phasing of flow-through capacitive deionization", Stanford Mechanical Engineering Conference, Stanford, California, May 6th, 2016
3. Editor's Choice VIII author for Journal of Chromatography A, 2014.
4. Outstanding Contribution Award, ASME Industry Honors Dinner, Santa Clara Valley Section, April 11, 2013.
5. Elected Fellow of the American Society of Mechanical Engineers (ASME), 2012.
6. Advisee Supreet Bahga was awarded 2nd Place Prize for the University Michigan Modeling and Simulation of Nano/Microsystems Contest, 2012.
7. Elected Fellow of the American Physical Society (APS), 2010.
8. Best Poster Award (out of 174), "Label-Free Toxin Detection Using Fluorescent Fingerprint Assay," Association for Lab Automation, LabAutomation, Palm Springs, CA, Jan. 24-27, 2010.
9. Outstanding Alumnus Award from the Mechanical Engineering Department of the University of Florida, April 11, 2008.
10. Best Paper Award, "Physics of pumping Methanol/Water Solutions for Fuel Cell Applications", with Cullen Buie and Shawn Litster, ASME-IMECE Conference, 2007.
11. Mentorship Recognition, served as mentor to Terman Engineering (Undergrad) Scholastic Awardee David Fenning, 2008.
12. Outstanding Achievement in Academia Award from The National Consortium for Graduate Degrees for Minorities in Engineering and Science (GEM), 2006
13. Best Paper award, Conference of the Electrochemical Society, Cancun, Mexico, 2006
14. Most downloaded paper in the history of Experiments in Fluids journal (Santiago et al., 1998)
15. Invitation to National Academy of Engineering Conference "Frontiers in Engineering," 2004-2007
16. Elected Vice Chair of Gordon Conference on the Physics and Chemistry of Microfluidics, Waterville Valley, NH (7/15-20 2007)
17. Elected Chair of Gordon Conference on the Physics and Chemistry of Microfluidics, Lucca, Italy (6/28 – 7/3, 2009)
18. Invited to Co-Chair the International Congress of Theoretical and Applied Mechanics (Adelaide, Australia, 2008).
19. Best Paper Award, ASME IMECE Conference, Advanced Energy Systems Division, 2006.
20. Best Poster Award, ASME IMECE Conference, 2005.
21. Best Poster in session award, Gordon Conference on the Physics and Chemistry of Microfluidics, Oxford England, 2005
22. Presidential Early Career Award for Scientist and Engineers (PECASE), 2004
23. Named by the Hispanic Engineers National Achievement Awards Corp. as a Role Model for young Hispanic engineers, 2004
24. National Science Foundation Faculty Early Career Development (CAREER) Award, 2003
25. Best Paper Award, Symposium on Thermodynamics and the Design, Analysis, and Improvement of Energy Systems, 2005
26. Best Poster award Annual Meeting of the American Institute of Chemical Engineering and American Electrophoresis Society, San Francisco, California, 2003
27. Best Poster award Gordon Conference on the Physics and Chemistry of Microfluidics, Big Sky Montana 2003
28. Nominee 2001 Technology Review Magazine TR100 Award
29. National Inventors Hall of Fame: Collegiate Inventors Award, 2001
30. Best Paper award at SEMI-THERM XVII, San Jose, CA USA, 2001
31. Frederick Emmons Terman Fellow (Faculty) Award, Stanford University 1998-1999
32. Ford Foundation Post-Doctoral Fellowship 1997-1998
33. UIUC Mechanical Engineering Alumni Teaching Fellow Award, 1994 – 1995
34. National Science Foundation SURGE Fellowship, 1992 – 1995
35. UIUC Mechanical Engineering Departmental Dupont Fellowship 1990-1991
36. UIUC Mechanical Engineering Departmental Chevron Fellowship 1991-1992

37. Exxon Corporation Fellowship, 1990 - 1994
38. Philip O. Yeaton Award for Excellence in Undergraduate Mechanical Engineering, University of Florida, 1990
39. National Action Council for Minorities in Engineering Scholarship ('87-'90)
40. First in Graduating Class, University of Florida, 1990
41. Graduation with High Honors, University of Florida, 1990

Keynote and Named Lectures

1. "Capacitive deionization of water: Energy dissipated versus stored." Keynote talk at the Microfluidics/Nanofluidics Symposium, American Society of Mechanical Engineering IMECE Conference 2016, November 17, Phoenix, Arizona.
2. "Capacitive deionization (CDI) of water: How much energy is dissipated and how much is stored?" Keynote talk at the 67th Annual Meeting of the International Society of Electrochemistry, August 22, 2016 in The Hague, The Netherlands.
3. "Life in the shock wave: Controlling DNA reactions with electric fields," The Stanley Corrsin Memorial Lecture in Fluid Mechanics, Whiting School of Engineering, Johns Hopkins University, April 14, 2016.
4. "DNA assays leveraging ion concentration shock waves," Keynote talk at the ASME NanoEngineering for Medicine and Biology Conference (NEMB), Houston, Texas, February 23, 2016.
5. "Thoughts on my background, graduate school, and a professorship," Keynote talk at the American Indian Scientists and Engineering Society Western Regional Conference, Stanford University, April 3-4, 2015.
6. "Novel on-chip isotachopheresis assays for nucleic acid analysis," Keynote lecture at the 29th International Symposium on MicroScale Bioseparations (MSB2013), Charlottesville, Virginia, March 10-14, 2013.
7. "Isotachopheresis for Extraction and Rapid Hybridization of Nucleic Acids," Plenary Lecture, 19th International Symposium, Exhibit & Workshops on Electro- and Liquid Phase-Separation Techniques, ITP 2012, Baltimore, MA, October 2, 2012.
8. "Novel on-chip isotachopheresis (ITP) assays for nucleic acid extraction and analysis," Plenary lecture presented at Microtech Conference & Expo, Santa Clara, June 19, 2012.
9. "Isotachopheresis for extraction and rapid hybridization of nucleic acids," Plenary lecture to be presented at the International Symposium, Exhibit & Workshop on Electro- and Liquid Phase-Separation Techniques, ITP 2012, Baltimore, MD, October 1, 2012.
10. "Sample Preparation and Analysis Using Isotachopheresis," University of Santiago, Chile, March 23, 2012.
11. "On-Chip Sample Preparation and Nucleic Acid Profiling Using Isotachopheresis," Plenary Talk at the American Electrophoresis Society Annual Meeting, Minneapolis, MN, October 17, 2011.
12. "Nucleic acid extraction, identification, and quantitation using isotachopheresis," Keynote Talk at the Lab-on-a-Chip World Congress, South San Francisco, September 29, 2011.
13. "On-Chip Isotachopheresis for Toxin Detection and Nucleic Acid Extraction," Plenary Talk at 6th Annual Utah State Nanotechnology Conference, Salt Lake City, Utah, October 15, 2010.
14. "Rapid Chemical Detection and Identification with a Hand Held Device," Association for Lab Automation, Plenary Award Finalist presentation, LabAutomation, Palm Springs, CA, January 23, 2010.
15. Santiago, J. G. "Novel Indirect Fluorescence Detection Methods Using Isotachopheresis: Minding the Gaps and Steps," Keynote talk at the 23rd International Symposium on Microscale Bioseparations Conference, Boston, Massachusetts, February, 2009.
16. Santiago, J.G., "Indirect Fluorescence Detection of Non Fluorescent Analytes Using Isotachopheresis," Plenary Speaker, Sixth International Conference on Nanochannels, Microchannels and Minichannels, June 23-25, Darmstadt, Germany May 15, 2008.
17. Santiago, J.G., "Electrokinetic Nanofluidic and Microfluidic Devices: Physics and Applications," the Distinguished Speaker at the Frontiers in Mechanical Engineering: NanoMechanical Engineering at University of Pennsylvania, Philadelphia, Pennsylvania, May 15, 2008.
18. Santiago, J.G., "Novel On-Chip Isotachopheresis Assays," the Linseth Lecture at Cornell University, January 29, 2008.

19. Santiago, J.G., "Making Shock Waves in Microfluidics: The Physics and Applications of Isotachophoresis," Keynote Address at the 60th Annual Meeting of the Division of Fluid Dynamics, Nov 18-20, Salt Lake City, Utah, 2007.
20. "Electrokinetic Microfluidics at Extreme Scales," Spanish Society of Chromatography and Related Techniques, Plenary Talk, SECyTA, Vigo, Spain, Nov. 2006
21. "Electrokinetic Microfluidics at Extreme Scales," Keynote Address at the Electrostatics Society Annual Meeting, Berkeley, CA 2006.
22. "Field Amplified Sample Stacking for On-Chip Capillary Electrophoresis," Keynote Address at the ASME International Mechanical Engineering Congress and Exposition, Irvine, California, November, 2004
23. "Electrokinetic Microfluidic Systems: Sample Stacking and Instabilities," Keynote Address at the International Electrokinetics Conference, June 13-17, Carnegie Mellon University, Pittsburgh, Pennsylvania, 2004
24. "Electrokinetic Microfluidic Systems," Keynote Address at the Seventh Annual Paul Flory Conference, Chemistry Department, Stanford University, 2004
25. "Electrokinetic Flow Instabilities in Microfluidic Systems," International Conference on Theoretical and Applied Mechanics (ICTAM '04), Plenary Lecture for Microfluidics Symposium, Warsaw, Poland 2004
26. "Electrokinetic Microfluidic Systems: Stacking and Instabilities," Massachusetts Institute of Technology, The Ronald J. Probst Lecture in Mechanical Engineering, Cambridge, Massachusetts, 2003
27. "Heterogenous Electrokinetic Systems," Keynote Address at the ASME International Mechanical Engineering Congress and Exposition, Washington D.C., November, 2003
28. "Electrokinetic Technology for Microfluidic Systems," Keynote Address of the IBC BioMEMS and Microfluidics, San Diego, CA, 2003
29. "Electrokinetic Microfluidic Systems," Keynote Address of the Joint American Institute of Chemical Engineering and American Electrophoresis Society Annual Meeting, Indianapolis, Indiana, 2002

(see also Other Invited Presentations below)

Activities and Service

External Service

Ad hoc Editor, Proceedings of the National Academy of Sciences, 2015, 2016.

Editorial Advisory Board member for the journal *Analytical Chemistry*, 2015-Present

Member Editorial Board of the Journal of Microfluidics and Nanofluidics, Springer-Verlag, 2003 – Present

Local Organizing Committee member, 26th International Symposium on MicroScale Bioseparations of the CASSS International Separation Society Conference, San Diego, May 2011.

Book review for Elsevier, 2010

Chair (2009) and Vice-Chair (2007) of Gordon Research Conference on Physics and Chemistry of Microfluidics. Included organizing entire program, raising funds (including proposals to NIH, NSF, Philips Corp.), moderating sessions, and managing invitations, 2007-2009.

Guest Editor for special issue on Fundamental Principles and Techniques in Microfluidics for the journal *Lab on a Chip*, 2009

Associate Editor of the journal *Lab on a Chip*, Royal Society of Chemistry Publishing, 2008 – 2013

Member of the Technical Program Committee, International Conference on Miniature Systems for Chemistry and Life Sciences (MicroTAS), 2008-2014

NSF proposal review, 2011

NSF Panel Reviewer, 2010

NIH Study Section Panel Reviewer, 2006, 2009, 2010

DOE proposal review, 2006, 2008

Reviewer of tenure cases for Mechanical Engineering at major universities, 2006, 2007 (2), 2008 (3), 2010 (2), 2011(2), 2012(1)

Reviewer of Israeli national science foundation, 2006

Panel Moderator Silicom Corporation Ventures Conference, 2006

Mentorship Panel member at The National Consortium for Graduate Degrees for Minorities in Engineering and Science (GEM), 2006

ASME Fluids Division Awards Committee, 2004 – 2005
Royal Society of Chemistry book proposal review, 2011
Springer-Verlag book proposal review, 2005, 2009
Cambridge Press book proposal review, 2005
Tutorial for Materials Research Society on Microfluidics, April 2004
Tutorial on Micron-Resolution Particle Image Velocimetry, Sponsored by TSI, Inc. September 2003
Review Panel for NSF SBIR Proposals, October 2003
Review Panel for NSF CAREER Proposals, 2003, 2005
NSF proposal reviews 2002-2006
Tutorial for American Society of Mechanical Engineers on Microfluidics, October 2002
Founder and Senior Consultant of Cooligy, Inc., Mountain View, CA; company commercialized microchannel liquid cooling devices for microelectronics, 2002 - 2006
Active supporter of the Foundation for a College Education (non-profit organization with a mission to promote access to college by students in traditionally underrepresented groups) 2001- 2006.
Chair of Minority Recruitment for the American Society of Mechanical Engineering's Micro-electro-mechanical Systems (MEMS) Sub-Division, 1999 – 2006
Member of American Society of Mechanical Engineering, American Institute of Chemical Engineering, Institute of Electrical and Electronics Engineers, American Physical Society, 1998 – Present
Member American Institute of Aeronautics & Astronautics, 1999-2000
Member Pi Tau Sigma, Golden Key, American Society of Mechanical Engineers, Society of Hispanic Engineering Students, 1988-1990

Session Conference Chair and Proceedings Reviewer

Session Chair for Electrokinetics I, The Batsheva de Rothschild Seminar Physics of Microfluidics, Sde Boker, Israel, January 5, 2017.
Session Chair at the 67th Annual Meeting of the International Society of Electrochemistry, August 23, 2016 in The Hague, The Netherlands.
Conference Chair, Gordon Research Conference on the Physics and Chemistry of Microfluidics, Barga, Italy, July, 2009
Conference Vice Chair, Gordon Research Conference on the Physics and Chemistry of Microfluidics, Oxford, England, planning for conference in August, 2007
Plenary Session Chair, Micro-Total Analysis Systems, San Diego, 2008.
Session Chair, Gordon Conference on the Physics and Chemistry of Microfluidics, Oxford, England, August, 2005
International Conference for Theoretical and Applied Mechanics, ICTAM, Poland, August, 2004
Lab Automation Conference, Assoc. for Laboratory Automation, Microfluidics Applications Session, San Jose, February 1-5, 2004
International Mechanical Engineering Congress and Exposition, Applications of Fluid Mechanics to Microsystems Technology, Washington, D.C., November 15-21, 2003
Annual Meeting of American Institute of Chemical Engineers, San Francisco, CA, November 16-21, 2003
7th International Conference on Miniaturized Chemical and BioChemical Analysis Systems (μ TAS2003), Squaw Valley, California, October 5-9, 2003
Physics and Chemistry of Microfluidics, Gordon Conference, Big Sky Resort, Montana, August 24-29, 2003
19th Annual Joint Meeting of the Electrophoresis Society and the American Institute of Chemical Engineers, Indianapolis, Indiana, November 3-8, 2002
International Mechanical Engineering Congress and Exposition, Microfluidic Transport Phenomena, 1998 to 2006
ASME/JSME Fluids Engineering Conference, Microfluidic Devices for Liquids, 1998
Advisory Committee Member for the IEEE Aerospace Conference, 1997
ASME Fluids Engineering Division Summer Meeting, Separated and Complex Flows, 1997
AIAA 35th Aerospace Sciences Meeting, Thermophysics Technical Committee Session, 1997

Internal Service

Guest lecturer EDUC 343X Navigating the Academic Profession, Diversifying Academia, Recruiting Excellence (DARE) Program, May 4, 2015

Member of School of DARE Fellowship Committee, Office of Vice Provost for Graduate Education, 2013-2015

Member of Hiring Committee for Senior Faculty, School of Engineering, 2014-2015

Chair of Promotion Committee (to Associate Professor), School of Engineering, 2013-2014

Chair of Reappointment Committee, School of Engineering, 2014-2015

Member of Reappointment Committee, School of Engineering, 2014-2015

Talk and panel member, "The Haves and the Have Nots: First-Gen/Low Income Grad Students and the Transition into Privilege," Grad Diversity Week, Stanford University, April 2015.

Faculty adviser for graduate students funded by Enhancing Diversity in Graduate Education--Science, Technology, Engineering and Mathematics (EDGE-STEM) Fellows Program, Stanford University, 2013-Present

Faculty sponsor and facilitator of Vice Provost for Graduate Education Twelve at Twelve discussion group, Winter Quarter 2012

Chair of Buildings 520 and 524 Teaching Lab Committee, 2012-2015

Chair of Search Committee, Mechanical Engineering Department, 2011-2012

Chair of Thermosciences Group, Mechanical Engineering Department, 2009-2012

Member of the Target of Opportunity Hiring Committee, Mechanical Engineering Department, 2011-2012

Member of the Mechanical Engineering Executive Committee, Mechanical Engineering Department, 2009-2012

Member Graduate Diversity Steering Committee, Office of Vice Provost for Graduate Education, 2007-Present

Member of School of Engineering 3D Fellowship Committee, 2011-2015

Office of Engineering Diversity Programs and associated talks, dinners, lunches, meetings, and gatherings) 1999-Present

Stanford Summer Engineering Academy (SSEA): Curriculum planning, student host, Includes three-hour lecture on engineering and preparation for college, 2001-Present

Talks and meetings with students at El Centro Chicano, Stanford Univ. 2002 – 2005, 2012, 2014

Panel member for Graduate Environment of Support (HUMSCI 201) course, 2011, 2012

Assembled appointment papers for Mechanical Engineering Department, 2010, 2011

Lectures to undergraduate and graduate meetings of Region 1 (California to Washington State) of undergraduate and graduate students of the Society of Hispanic Professional Engineers, 2011

Panel member for Fellowship Application Workshop at El Centro Chicano, 2009

Panel member for Fellowship Application Workshop Consortium, 2009

Assembled appointment papers for Mechanical Engineering Department, 2008

Active in recruiting and retention efforts for minorities and women in engineering (including over 20 events per year such as luncheon's, group advising, presentations, dinners, etc.) 1998-Present

Presentation and discussion with minority students taking enrolled in the Graduate Environment of Support (HUMSCI 201), 2006, 2010

Member Stanford Campus Residential Leaseholders (SCRL) Residential Traffic Committee, 2007-2009

Coordination and participation in ME Department admit day tours and student interviews 2001-Present

Coordination and participation in star applicant visit day, including tours and interviews 2001 – Present

Member Committee of Graduate Studies, Stanford, 2006-2008

Member of Mechanical Engineering Multiphysics Faculty Search Committee, 2005-2007

Member of Mechanical Engineering Biomechanics Faculty Search Committee, 2005-2006

Member of Stanford University Latino Faculty Committee, 2001-2006

Chair of promotion committee for Dr. Rainer Fasching (Sr. Research Assoc.), 2004-2005

Active Participation in Fluid Mechanics Search committee, 2004-2005

Presentation to Stanford Society of Chicano/Latino Engineers and Scientist (SSCLES), 2004, 2005

Presentation and reception for Graduate Diversity Admit Weekend events, 1999, 2004, 2006, 2007, 2008

Presentation for Admit Weekend to incoming freshman, April 2005

Presentation to the Latino Engineering Graduate Organization, April 2005, 2006, 2008
Admit Weekend faculty panel member and presenter, 2003 – 2005
Keynote speaker at Seoul National University/Mechanical Engineering (Thermal Sciences Group)
Conference at Stanford, 2004
Center for Integrated Systems Advisory Committee Conference speaker, 2004
Presentation to Mechanical Engineering Visiting Committee (and tours), 2004
Reviewer for Stanford Office of Technology Licensing Awards, 2001, 2002, 2004

Current PhD Graduate Student Advises

Post-Qualifying Exam

1. Ali Hemmatifar, Mechanical Engineering
2. Diego Oyarzun, Mechanical Engineering
3. Erica Castillo, Mechanical Engineering

Pre-Qualifying Exam

4. Matt James
5. Ashwin Ramachandra

Current Postdocs/Research Associate

1. James Palko, PhD Material Science
2. Crystal Han, PhD Mechanical Engineering

Graduated Students at PhD and MS level, Postdoctoral Researchers, Undergraduates, and Visitors

To date, I have graduated 28 PhD's and advised 7 postdoctoral researchers and research associates. 17 of these former students and postdocs are now professors at major universities. I have also advised 13 MS students and 28 undergraduate researchers. I have hosted nine US and international visitors.

Issued Patents

1. US 6,606,251 Power conditioning module
2. US 6,653,651 Micron resolution particle image velocimeter
3. US 6,678,168 System including power conditioning modules
4. US 6,881,039 Micro-fabricated electrokinetic pump
5. US 6,882,543 Apparatus for conditioning power and managing thermal energy in an electronic device
6. US 6,942,018 Electroosmotic microchannel cooling system
7. US 6,991,024 Electroosmotic microchannel cooling system molecules
8. US 7,019,972 Apparatus for conditioning power and managing thermal energy in an electronic device
9. US 7,050,308 Power conditioning module
10. US 7,057,198 Depth-of-field micron resolution velocimetry with pulsed images of injected solid particles
11. US 7,061,104 Apparatus for conditioning power and managing thermal energy in an electronic device
12. US 7,070,681 Electrokinetic instability micromixer
13. US 7,086,839 Micro-fabricated electrokinetic pump with on-frit electrode
14. US 7,131,486 Electroosmotic microchannel cooling system
15. US 7,134,486 Control of electrolysis gases in electroosmotic pump systems
16. US 7,185,697 Electroosmotic microchannel cooling system
17. US 7,231,839 Electroosmotic micropumps with applications to fluid dispensing and field sampling
18. US 7,316,543 Electroosmotic micropump with planar features
19. US 7,334,630 Closed-loop microchannel cooling system
20. US 7,449,122 Micro-fabricated electrokinetic pump

21. US 7,458,783 Method and apparatus for improved pumping medium for electro-osmotic pumps
22. US 7,645,368 Orientation independent electroosmotic pump
23. US 7,799,453 Fuel cell with electroosmotic pump
24. US 7,846,593 Heat and water management device and method in fuel cells
25. US 7,951,278 Method of detecting directly undetectable analytes using directly detectable spacer
26. US 8,017,408 Device and methods of detection of airborne agents
27. US 8,821,704 Control of chemical reactions using isotachopheresis
28. US 8,247,238 Device and methods of detection of airborne agents
29. US 8,277,628 Method and apparatus using electric field for improved biological assays
30. US 8,382,460 Peristaltic pump with constrictions at fixed locations
31. US 8,394,251 Improved control of chemical reactions using isotachopheresis
32. US 8,414,754 Electrophoretic sample analysis and approach therefor
33. US 8,431,409 Device and methods of detection of airborne agents
34. US 8,460,530 Method for modifying the concentration of reactants in a microfluidic device
35. US 8,524,061 On-chip hybridization coupled with ITP based purification for fast sequence specific identification
36. US 8,562,804 Fluorescent finger prints for indirect detection in isotachopheresis
37. China 2,459,6.1 Method and Apparatus Using Electric Field for Improved Biological Assays
38. US 8,702,948 Method and Apparatus Using Electric Field for Improved Biological Assays
39. US 8,721,858 Non-focusing tracers for indirect detection in electrophoretic displacement techniques
40. US 8,821,704 Control of chemical reactions using isotachopheresis
41. US 8,431,409 B1 Device and methods of detection of airborne agents
42. US 8,846,314 B2 Isotachopheretic focusing of nucleic acids
43. US 8,986,529 B2 Isotachopheresis having interacting anionic and cationic shock waves
44. US 8,999,129 Liquid and gel electrodes for transverse free flow electrophoresis
45. US 9,057,673 B2 Method of preparing RNA from ribonuclease-rich sources
46. US 9,097,676 B2 Device and methods of detection of airborne agents
47. US 9,151,732 B2 Enhanced isotachopheresis assays using additives with spatial gradients

Recently published patent applications

1. CA2906730 A1 Capillary barriers for staged loading of microfluidic devices
2. WO 2014153092 A1 Capillary barriers for staged loading of microfluidic devices
3. US 20150037784 A1 Flow regulation in fluidic systems using a phase-change material at system Ports
4. US20150072267 A1 Energy harvesting with flow-through porous electrodes
5. US 20150191717 A1 Simultaneous extraction and separation of rna and dna from single cells using electrophoretic techniques
6. WO 2015106146 A2 Simultaneous extraction and separation of rna and dna from single cells using
7. WO 2014186238 A1 Persistent collocation in time series imagery
8. EP 2972185 A1 Barrières capillaires pour chargement étagé de dispositifs microfluidiques
